OBJECTIVE

Seeking for an internship at a firm where I can apply my academic foundational knowledge in accounting, taxation and other data analytics skills. Eager to leverage proficiency in Microsoft Excel, Power BI, and SQL to contribute to data-driven decision-making in auditing, taxation or finance domains.

QUALIFICATIONS

Examination	Year	School/College/Institution	Score %	Rank
CA Intermediate	May 2025	ICAI	370/600	-

Class XII (BSEB)	April 2024	S.K. Secondary School	428/500 85.60%	District Rank 1st
Class X (CBSE)	April 2022	S.K.M. Public School	442/500 88.40%	School Rank 4th

COURSES & CERTIFICATE

Completed 100-hrs compulsory course prescribed by ICAI on Information Technology Training (ITT), Passed 3 exams/tests and got a certificate.

Extra-Curricular Activities

Interested in SKETCH and ARTS; regularly engage in creative sketching and personal art projects to express ideas. Also passionate about playing CHESS.

Key Skills

Data Analytics & Visualization:

- **Microsoft Excel:**
 - Data cleaning and transformation using Power Query, PivotTables, and Slicers.
 - Proficient in VLOOKUP, XLOOKUP, INDEX-MATCH, data validations, conditional formatting and other logical functions.
 - Also, can create fully interactive and dynamic dashboards with KPIs, charts, and slicers.
- **Power BI:** Data cleaning, transformation (Power Query) and visualization.
- **SQL:** Familiar with DDL, DML, and DQL commands, including joins, unions, subqueries, CTEs and VIEWS.

Accounting Software:

- **Tally:** Familiar with basic entries, ledger, groups, etc.

Soft Skills:

- Communication, adaptability, commitment to learning.

Practical Projects

- **Project 1: [Detailed Sales Analysis for Adidas US](#)** (Personal Project)
Objective: Drill down into the sales data and analyze key metrics, including performance by month, region, retailers, and product categories to provide data-driven insights for managerial decisions.
- **Project 2: [School Dashboard](#)** (Personal Project)
Objective: Analyze the given data and prepare a dashboard with key metrics, to reveal overall performance of its day-to-day operations.
- **Project 3: [Fashion and Retail industry Sales Dashboard](#)**
Objective: Developed an interactive Excel dashboard for a fashion and textile company, enabling real-time analysis of sales data. The dashboard provides comprehensive visualizations and insights into key metrics, including sales by financial year, state, category, and sales channel.
